

**Converteam to upgrade the 5-Stand Tandem Cold Mill  
of US Steel at Great Lakes Works in Detroit, Michigan**

US Steel Great Lakes Works, Detroit, MI

Following on from the successful cold mill upgrades for US Steel Serbia, Converteam USA have received an order from US Steel for the upgrade of the 5 Stand Tandem Cold Mill at their Great Lakes Works in Detroit Michigan. This order was won after working with USS using their Project Delivery System (PDS) and will utilize their Design For Start-Up philosophy (DFSU). The project is for the supply of Converteam's Level 2, TCM3000 adaptive set-up model, HPCi based Level 1 and PECe digital regulators retrofitted to the existing GE MG set controls. Converteam will also be responsible for the Construction Engineering. The contract is worth \$5M and commissioning will take place in a phased manor, starting with the drives in October 2007.
